U.S. Citizen

PROFILE STATEMENT

- Enthusiastic and motivated Full Stack Developer with a background in Accounting and willingness to learn new technologies
- Skilled at writing well-designed and efficient code from scratch using JavaScript with ability to build a responsive web application
- Known for a strong attention to detail and problem-solving skills with an analytical mindset

SKILLS & TOOLS

Languages: Java, JavaScript/jQuery, HTML, CSS

CSS Framework: Bootstrap, Materialize

PROJECTS

Pack-It

January 2020

- Launched a web application that enables users to check weather of the city to visit and have suggestions of the items to pack depending on each different weather
- Users can save/remove and retrieve images of items to/from their suitcase using local storage feature
- Successfully stored JSON data from API calls in object and wrote what-to-wear logic for specific weather conditions
- Customized query for API calls so that it would generate right images through Google Custom Search

Weather-Dashboard

December 2019

- Developed a weather application providing a five-day forecast at the bottom of the screen with the current forecast above; recently searched cities are displayed on the left side
- Managed to dynamically display weather information if users' geolocation is available or city name or US zip code is searched

Day-Planner

December 2019

- Created a multi-day planner application that enables users to customize their daily plan by one-hour time block; schedules are saved in local storage and retrieved for future use
- Designed color-coded time block with the logic to compare the time value assigned to current time utilizing moment.js

EDUCATION

Virginia Tech, Pamplin College of Business, Blacksburg, VA

August 2016

B.S. Accounting and Information Systems

GPA: 3.84

Honors: Summa Cum Laude
